

ADVANTAGES

-  High Vibration Isolation Performance.
-  Fast, Easy Machinery Installation.
-  Installation of Sensitive Quality Control and Testing Equipments and Heavy Production Machinery possible in the same workshop.
-  Flexible layout Floor Plan, ease in machine relocation to accommodate expansion plans & technology induction - Permanent mobility of CMM with Membrane Air Spring, Series DMAS.
-  Low Maintenance and Easy to Install.
-  Automatic Machine Levelling of $\pm 0.01\text{mm}$ and $\pm 0.1\text{mm}$ available.
-  Prevents forced deterioration of sensitive machine, expensive unscheduled downtime and maintenance resulting in production losses.
-  Solutions of different natural frequencies available to suit various vibration problems based on vibration analysis report.
-  Maintains measuring integrity of metrology equipments.
