

25 years of Expertise in Shock & Vibration Isolation

# Dynemech

VIBRATION TECHNOLOGY

Engineered Systems for  
**Vibration & Shock Attenuation**

*Dynemech Shock & Vibration Isolation is not just about supporting weight – it is the engineering of time response, frequency control and energy dissipation.*

## Dynemech Vibration Solutions for High Speed Presses

High-speed mechanical presses generate vibrations due to time-varying stamping forces, impact loads, and inertial unbalance. These vibrations are transmitted through the crank and slide mechanisms into the machine structure, where frame flexibility, joint clearances, wear, material deformation and structural resonance amplify and shape the vibration spectrum.

**Vibration Isolation options for High-Speed Power Presses based on operating and surrounding conditions.**

# Dynemech

VIBRATION TECHNOLOGY

## Vibration Isolation Solutions for Large Stamping & Forging Presses

Vibration isolation options based on operating and surrounding conditions.

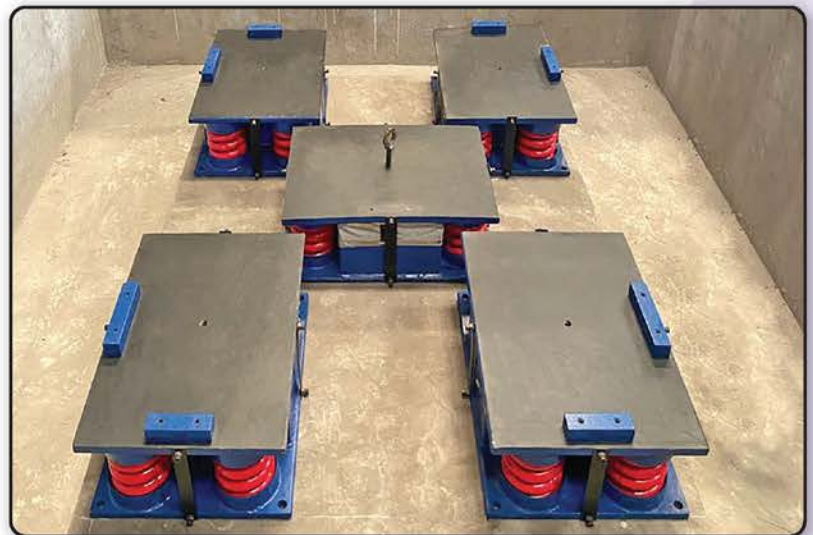

## Shock Isolation Systems for Forging Hammers Impact and Shock Control

## Shock Isolation Systems with Viscous Damping for Forging Hammers

## Fabric Reinforced High-Impact and Shock Isolation Plates

# Dynemech

VIBRATION TECHNOLOGY

## Isolated Foundations for Shock and Vibration Isolation

Engineered for High-Shock Machinery and Precision Measuring Equipment

## Precision Levelling Mounts

## High Precision Levelling & Alignment Mounts

## Precision Metrology Equipment Tables

## Precision Auto-Levelling Pneumatic Anti Vibration Tables

Series DIT-AHL

Series DIT-AM

## Membrane Air Springs

Series DMAS

Series DRAS

## Rubber Air Springs

Series DLPM

Series DRAS

# SEISMION Dynemech

ACTIVE VIBRATION ISOLATION VIBRATION TECHNOLOGY

## Mastering Vibrations : High-Performance Active Isolation Solutions

Seismion GmbH provides cutting-edge vibration isolation systems, delivering active control of 6 degrees of freedom to create highly noise-free environments for scientific advancement, metrology, semiconductor production and nano fabrication.

### Reactio 2

- **Design** : Flat and low-weight, easy to install
- **Payload Capacity** : 65 kg and 150 kg
- **Sizes** : 500x400 mm, 600x500 mm, 600x600 mm

### Reactio 3

- **Design** : Modular unit with effective electromagnetic shielding
- **Payload Capacity** : Up to 400 kg per module

### Seismion Beams

- **Design** : Modular pair of bar elements for flexible spacing
- **Payload Capacity** : Up to 650 kg (set of two)
- **Options** : Cleanroom & vacuum compatible
- **Sizes** : 600 mm & 800 mm lengths

### Atlas Series (Atlas, FF, Dynamic)

- **Design** : Modular system (3+ units) for heavy-duty
- **Payload Capacity** : Up to 1 ton per module
- **Variants** : Atlas dynamic for high power, fast settling
- **Options** : Cleanroom & vacuum compatible

## COMMON PERFORMANCE FEATURES & OPTIONS

**Additional Floor Feedforward** : Exceptional Isolation Performance.

**Adjustable Gain** : Application-specific optimization.

**Applications** : Microscopy & Nano Scale Imaging, Lithography & Wafer Inspection Systems, Metrology Equipments etc.

Marketed in India by : **DYNEMECH SYSTEMS PVT. LTD.**

## APPLICATIONS :

1. Metal Forming & Stamping Machinery, Mechanical Presses, High-Speed Presses and Forging Presses
2. Machine Tools & Manufacturing Equipment, CNC Turning Centers, VMC/HMC Machines
3. Precision Metrology & Quality Inspection CMMs, Roundness Testers, Surface Profilers, Optical Inspection Systems
4. Semiconductor & Electronics Manufacturing Lithography Tools, Wafer Inspection Systems, Probe Stations and Semiconductor Test Equipments
5. Optics, Photonics & Laser Systems, Laser Interferometers, Optical Benches, Microscopy Systems, Alignment and Imaging Platforms
6. Analytical & Life-Science Instruments, ICP-MS, Mass Spectrometers, Chromatography Systems and biotechnology
7. Scientific Research & Advanced Laboratories, Electron Microscopes (SEM/TEM), AFM/STM Systems
8. Textile, Printing & High-Speed Rotating Machinery, Weaving Looms, Knitting Machines and Textile Processing Equipment
9. Power Generation & Heavy Industrial Equipment, Diesel Generators, Turbines, Compressors, Pumps, Blowers and HVAC Systems
10. Structural, Seismic & Infrastructure Protection, Seismic Isolation Platforms, Vibration-Isolated Foundations, Equipment protection in Data Centers and Museums
11. Testing, Simulation & R&D Facilities, Shakers, Fatigue Testing Machines, Endurance Test Rigs, Automotive and Aerospace Test Setups
12. Special-Purpose Isolation Tables & Custom Systems, Anti-Vibration Tables, Pneumatic Isolation Workstations, Clean room and Vacuum-Compatible Platforms

Manufactured by : **DYNEMECH SYSTEMS PVT. LTD.**

Corporate Office : RU-395, Near Power House, Main Outer Ring Road, Pitam Pura, Delhi-110 034 (India)
